Daniel Marko

SoftwareDev - Waterford Institute Of Technology

daniel911tipp@gmail.com - +353838811897

Profile Summary

My name is Daniel Marko and I am currently studying Software Development at the Waterford Institute of Technology. I have a passion for technology and software engineering, which has led me to pursue an internship in this field. With my knowledge of programming languages such as Python, Java and Kotlin, combined with my strong problem-solving skills and analytical thinking ability, I believe that I will be a valuable asset to any organization looking for an intern. My experience working on projects both individually or collaboratively makes me confident in the quality of work that I can produce while working under pressure. Furthermore, my enthusiasm towards learning new technologies means that I am always eager to expand upon existing skill sets which will make me even more suited to any job role within your company.

Project History

Client to Server Connection for Distributed Systems - "Developed a Java application utilizing sockets to establish a connection between clients and servers in distributed systems."
